Subject: 2 questions in connection with a national call next week

Hi Pete, I hope you have some fun plans for the weekend!

1. We have our monthly national WQS call on Tuesday. One of the items on the agenda is how are states and tribes using Human Health Benchmarks for Pesticides (HHBPs):

<https://ordspub.epa.gov/ords/pesticides/f?p=HHBP:home:3576975104292:,::::>

Do you know if North Dakota is using HHBP to derive human health criteria for pesticides?

Here's a link to the fact sheet that was just updated in August:

<https://www.epa.gov/system/files/documents/2021-07/hh-benchmarks-factsheet-2021.pdf>

2. Another topic is site specific numeric translations of narratives to address PFAS/PFOA. They want to know if states are going this route, and what sources of information they are relying on.

Do you have any information you can share on what ND is doing?

Thanks,

Holly Wirick
